

I think it is imperative that XM radio be allowed to offer different services. I've found that in order to get local weather and traffic I have to listen to the local stations that are not always child friendly. A service, like XM Traffic and Weather, allows me to get the information I need without having to worry about the wrong comment or the wrong song being played. Attempting to stop a service that will be offered and that I CAN'T get anywhere else is simply put wrong and unamerican.
